Please complete the attached developmental history form to the best of your ability. It is not necessary to fill in all parts of the form depending on the age of the child and your particular concerns. (ie details of the child's developmental milestones are less important in school-aged children, especially if you had no concerns early on).

I will review the form and then an appointment will be scheduled. Occasionally I will recommend that you see someone else first, if I don't think I am the best person to evaluate the problem as presented. I may also request additional information prior to the appointment, and if there has been school or private testing done, I like to review that beforehand as well.

There is often a 2-3month wait for these appointments - please complete and return as soon as possible as we schedule appointments as the paperwork is received.

Please note that only patients of Children First Pediatrics can be seen for developmental and behavioral evaluations. I am not able to see children who do not also come to us for their well care.

I look forward to seeing you soon.

Cathleen J. McGrath, M.D.
